IBEX REPORTS THIRD QUARTER FISCAL 2011 RESULTS

MONTREAL, Quebec, June 28, 2011 – IBEX Technologies Inc. (TSX Venture: IBT) today reported its financial results for the nine months ended April 30, 2011.

FINANCIAL RESULTS FOR THE THIRD QUARTER OF FISCAL 2011

Sales for the quarter ended April 30, 2011 totaled \$597,074, an increase of 27% as compared to \$469,502 in the same period of the prior year. The increase in sales can be attributed to a return to a normal ordering pattern by one of our major customers.

"We are pleased to see a return to more normal selling patterns, however the strong Canadian dollar continues to have a negative impact on our business profitability when compared to year-ago", said Paul Baehr, IBEX President and CEO.

Excluding financial and R&D expenses, operating expenses for the third quarter ended April 30, 2011 decreased 22% from \$659,431 to \$451,558. A significant portion of this reduction was due to an inventory related accounting gain which will be reversed in the next quarter.

The Company recorded net earnings of \$131,577 compared to net earnings of \$137,927 for the same period year ago. This decrease in net earnings is principally due to several factors such as:

- lower currency gains related to forward contracts
- increase in R&D expenses
- increase in amortization expenses related to investments in new equipment

Due primarily to investment in inventory and capital assets, cash, cash equivalents, and marketable securities decreased 11% during the quarter ended April 30, 2011 to \$1,986,434 from \$2,231,287 as of January 31, 2011. The Company's working capital was \$2,750,754 as at the end of the third quarter ended April 30, 2011 up from \$2,598,828 as at the end of the prior quarter ending January 31, 2011. This increase in working capital traces to an increase in current assets such as inventory and accounts receivable.

FINANCIAL RESULTS FOR THE YEAR TO DATE

Reported sales for the nine months ended April 30, 2011 totaled \$1,485,699, a decrease of 25% as compared to \$1,987,196 for the same period in the prior year. This decrease in sales is principally due to a reduction in orders in both the enzymes and arthritis product lines. The reduction in the enzymes line was due to a temporary adjustment of inventories by our key customers, whose ordering pattern has now returned to normal. The reduction in arthritis assays stemmed from a decrease in the number of arthritis trials conducted by our key customers.

Research and development expenses for the nine months ended April 30, 2011 totaled \$225,021 compared to \$7,980 in the nine months ending April 31, 2010. In the third quarter of fiscal 2010, the

Company hired new scientific specialists to work on its arthritis assays product line and should introduce new assays with financial benefits in Fiscal 2012.

Net loss for the nine months ended April 30, 2011 was \$199,641, compared to net earnings of \$634,797, for the same period in previous fiscal year. This net loss is mainly due to lower currency gains made on hedging against the US dollar, lower sales, and to the increase in R&D expenses.

Excluding R&D and financial expenses, operating costs for the nine months ended April 30, 2011 decreased to \$1,503,945 from \$1,762,712, principally due to a higher inventory allocation (the transfer of expenses to the balance sheet as a result of producing in current quarters for sale in future quarters), as well as reduced compensation costs.

Owing primarily to increased investment in inventory and capital assets, cash, cash equivalents, and marketable securities decreased 34% over the nine months ended April 30, 2011 to \$1,986,434 from \$3,033,556 on July 31, 2010. Working capital decreased to \$2,750,754 on April 30, 2011 from \$3,278,875 as at July 31, 2010.

Financial Summary for the nine months ending

	April 30, 2011	April 30, 2010
Revenues	\$1,485,699	\$1,987,196
(Loss) Earnings Before Interests, Tax, Depreciation & Amortization	(\$99,730)	\$717,180
Depreciation & Amortization	\$117,655	\$93,676
Net (Loss) Earnings	(\$199,641)	\$634,797
(Loss) Profit per Share	(\$0.01)	\$0.03
Cash, Cash Equivalents & Marketable Securities	\$1,986,434	\$2,973,894
Working Capital	\$2,750,754	\$3,482,086
Outstanding shares at report date (Common Shares)	24,703,244	24,703,244

LOOKING FORWARD

Fiscal 2011 looks to be a difficult year for IBEX due to softness in the US business environment and the strong Canadian dollar.

Despite a difficult outlook for Fiscal 2011, we have made two important investments in our future. IBEX has recently completed a project to add additional enzyme-related manufacturing capacity, and has also re-established a small R&D group with the object of adding to our line of arthritis immunoassays and also improving our existing assays. We expect to introduce new assays in calendar 2011, with financial benefits accruing in the second half of Fiscal 2012.

ABOUT IBEX

The Company manufactures and markets a series of proprietary enzymes (heparinases and chondroitinases). These enzymes are used in pharmaceutical research, quality assurance, and in the case of Heparinase I, in diagnostic devices which measure hemostasis in patients.

IBEX also manufactures and markets a series of arthritis assays which are widely used in pharmaceutical research. These assays enable the measurement of both the *synthesis* and *degradation* of cartilage components, and are powerful tools in the study of osteo- and rheumatoid arthritis.

For more information, please visit the Company's web site at www.ibex.ca.

Safe Harbor Statement

All of the statements contained in this news release, other than statements of fact that are independently verifiable at the date hereof, are forward-looking statements. Such statements, based as they are on the current expectations of management, inherently involve numerous risks and uncertainties, known and unknown. Some examples of known risks are: the impact of general economic conditions, general conditions in the pharmaceutical industry, changes in the regulatory environment in the jurisdictions in which IBEX does business, stock market volatility, fluctuations in costs, and changes to the competitive environment due to consolidation or otherwise. Consequently, actual future results may differ materially from the anticipated results expressed in the forward-looking statements. IBEX disclaims any intention or obligation to update these statements.

1. Interim financial information

These interim consolidated financial statements do not conform in all respects to the disclosure requirements of Canadian generally accepted accounting principles for annual financial statements and as such the consolidated interim financial statements should be read in conjunction with the annual consolidated financial statements for the years ended July 31, 2010 and 2009, which do conform to the disclosure requirements. These consolidated interim financial statements have been prepared using the same accounting policies as outlined in note 2 to the consolidated financial statements for the years ended July 31, 2010 and 2009 except as outlined in Note 2 below.

The consolidated interim financial statements for the nine months ended April 30 2011 and for the nine months ended April 30 2010 are unaudited and have not been reviewed by the company's auditors. The results of operations for this period are not necessarily indicative of the trends of the operating results for the full year.

2. Significant accounting policies

Financial instruments

During the year ended July 31, 2008, the Company adopted the Canadian Institute of Chartered Accountants ("CICA") Handbook Section 1530, "Comprehensive Income"; Section 3251, "Equity"; Section 3855, "Financial Instruments – Recognition and Measurement"; Section 3862, "Financial Instruments – Disclosures"; Section 3863, "Financial Instruments – Presentation"; and Section 3865, "Hedges". These standards provide accounting guidelines for the recognition, measurement, disclosure and presentation of financial assets, financial liabilities and non-financial derivatives, as well as the introduction of a new statement of comprehensive income. Section 3865 did not have an impact on the Company as it does not use hedge accounting. The Company elected to early adopt Sections 3862 and 3863, as permitted by the standards.

The Company's adoption of these new financial instrument standards resulted in changes in the accounting for financial instruments, as well as the recognition of certain transitional adjustments that have been recorded in opening deficit as described below. The principal changes in the accounting for financial instruments due to the adoption of these accounting standards are as follows.

a) Comprehensive income (loss)

Comprehensive income (loss) is defined as the change in equity from transactions and other events and circumstances from sources other than shareholders, and is composed of the Company's net earnings (loss) and other comprehensive income (loss). Other comprehensive income (loss) refers to revenues, expenses, gains and losses that are recognized in comprehensive income (loss) but excluded from net earnings (loss). The Company does not have any components that qualify as other comprehensive income (loss).

b) Financial assets and financial liabilities

Financial assets and financial liabilities, including derivatives, are recognized on the consolidated balance sheet when the Company becomes a party to the contractual provisions of the financial instrument or non-financial derivative contract. Financial instruments are initially recognized at fair value and are classified into one of five categories: held for trading, available for sale, held to maturity, loans and receivables, or other financial liabilities. They are subsequently accounted for based on their classification as described below. The classification depends on the purpose for

Ibex Technologies Inc.
Notes to Consolidated Financial Statements
For the nine months ended April 30, 2011 and 2010 (unaudited)

which the financial instruments were acquired and their characteristics. Except in very limited circumstances, the classification is not changed subsequent to initial recognition. Transaction costs are expensed as incurred.

Held for trading

Financial instruments classified as held for trading are carried at fair value at each balance sheet date with the changes in fair value recorded in net earnings (loss) in the period in which the changes arise.

Available for sale

Financial instruments classified as available for sale are carried at fair value at each balance sheet date with the changes in fair value recorded in other comprehensive income (loss) in the period in which the changes arise. Securities that are classified as available for sale and do not have a readily available market value are recorded at cost. Available-for-sale securities are adjusted to fair value through earnings (loss) whenever it is necessary to reflect other than temporary impairment. Upon derecognition, all cumulative gains or losses are then recognized in net earnings (loss).

Held to maturity, loans and receivables, and other financial liabilities

Financial instruments classified as held to maturity, loans and receivables, and other financial liabilities are carried at amortized cost using the effective interest method, and interest income or expense is included in net earnings (loss) over the expected life of the instrument.

Management has selected the following classifications and bases of accounting for the Company's financial instruments:

Asset/Liability	Classification	Basis of accounting
Cash and cash equivalents	Held for trading	Fair value
Marketable securities	Held to maturity	Amortized cost
Accounts receivable	Loans and receivable	Amortized cost
Accounts payable and accrued liabilities	Other financial liabilities	Amortized cost

c) Embedded derivatives

All derivative instruments are recorded in the consolidated balance sheet at fair value at each balance sheet date. Derivatives may be embedded in other financial instruments (the "host instrument"). Prior to the adoption of the new standards, such embedded derivatives were not accounted for separately from the host instrument. Under the new standards, embedded derivatives are treated as separate derivatives if their economic characteristics and risks are not clearly and closely related to those of the host instrument, the terms of the embedded derivative are the same as those of a stand-alone derivative, and the combined contract is not held for trading or designated at fair value. These embedded derivatives are measured at fair value at each balance sheet date with subsequent changes recognized in net earnings (loss) in the period in which the changes arise. The Company selected August 1, 2002 as its transition date for embedded derivatives, which is the latest date allowed by the accounting standard.

The Company enters into certain contracts for the sale of non-financial items that are denominated in currencies other than the Canadian dollar, the Company's functional currency. In cases where the foreign exchange component is not leveraged, does not contain an option feature and the contract is either denominated in the functional currency of the counterparty, the non-financial item is routinely denominated in the currency of the contract or the currency of the contract is commonly used in the economic environment in which the transaction takes place, the embedded derivative is considered to be closely related and is not accounted for separately. The fair value of financial instruments is determined using recognized valuation models using observable market-based inputs.

Embedded foreign currency derivatives gave rise to a transitional adjustment for the cumulative impact of adopting these new standards for prior years, which was recognized as an adjustment directly to the opening deficit of fiscal 2008. No other transitional adjustments were recorded as a result of the adoption of the new standards. The impact of the adoption was a one-time increase of \$4,711 to deficit and accounts payable and accrued liabilities.

During the nine months ended April 30, 2011, the impact of the change in the fair value of the derivatives related to sales contracts is recorded in foreign exchange loss and the offset of \$2,233 as at April 30, 2011 is recorded in accrued liabilities. (2010; loss of \$77,766).

Capital disclosures

During the year ended July 31, 2008, the Company early adopted CICA Handbook Section 1535, "Capital Disclosures", as permitted by the standard. The standard requires the disclosure of both qualitative and quantitative information that enables the users of the financial statements to evaluate the Company's objectives, policies and processes for managing capital.

The adoption of this Section did not have an impact on the Company's financial position, earnings or cash flows; however, it did result in expanded disclosure.

Inventories

On August 1st, 2008, the Company adopted CICA Handbook section 3031 "Inventories", which provides guidance on the determination of costs and their subsequent recognition as an expense, provides guidance on the determination of cost, including the allocation of fixed and variable overheads, narrows the permitted costs formulas, and expands the disclosure requirements to increase transparency.

Inventories are composed of work in process and finished goods, which are valued at the lower of cost or net realizable value determined on a first-in, first-out basis. Inventory cost includes materials, direct labor and attributable overhead. During the nine months ended April 30 2011 the Company recognized an expense of \$544,778 in cost of products sold (April 30 2010: \$767,806).

Ibex Technologies Inc.
Notes to Consolidated Financial Statements
For the nine months ended April 30, 2011 and 2010 (unaudited)

	April 30, 2011	July 31, 2010
	\$	\$
Inventories		
Assay kits	35,454	14,419

Work in process – enzymes	20,922	14,815
Total inventory	452,229	226,364

Goodwill and Intangible Assets

Section 3064 replaces the existing Sections 3062, “Goodwill and Other Intangible Assets”, and 3450, “Research and Development Costs”. The standard provides guidance on the recognition, measurement and disclosures of goodwill and intangible assets. Management does not expect this section to have a significant impact on its financial position, earnings or cash flows.

3. Marketable securities

(a) Marketable securities include the following:

	April 30 2011	July 31 2010
	\$	\$
Debt Securities – at cost [which approximates market value (note 2(b))]	700,000	700,000
	700,000	700,000

(b) The marketable securities as at April 30 2011 consist of GICs held at highly rated institutions which mature on April 8, 2013 in the amount of \$300,000, and March 8, 2012 in the amount of \$400,000, and have annualized yields of 1.70% and 2.26% respectively.

4. Capital stock and contributed surplus

As at April 30 2011, the company’s authorized capital stock is as follows:

(a) Unlimited as to number

- Cumulative, redeemable First Preferred Shares, issuable in series. The first series consisted of 150,000 shares, convertible into common shares at a rate of 188.68 voting common shares for each preferred share.
- Cumulative, redeemable convertible Second Preferred Shares, issuable in series.
- Third Preferred Shares, issuable in series.
- Common shares.

(b) Issued

Book value	April 30 2011 \$	July 31 2010 \$
24,703,244 Common shares (2010: 24,703,244)	52,660,078	52,660,078

(c) Stock Options

As at April 30 2011, the weighted average fair value of the previous options granted at an exercise price at or above market price is \$26,000. No options were granted during the nine months ended April 30 2011.

For the nine-month period ended April 30 2011, there was a charge to general and administrative expenses of \$40,993 and a corresponding increase to contributed surplus for stock based compensation amortization.

Under the existing IBEX Technologies Inc. ("IBEX") stock option plan, common shares may be issued to full-time employees of the company, directors and consultants, the terms and conditions of grants thereunder being contingent upon market values, the discretion of the Board of Directors and regulatory requirements. The number of common shares reserved for issuance under this stock option plan is currently 1,592,992. The maximum term permissible under the plan is 10 years which is determined at the date of grant as well as the vesting privileges.

The following table summarizes the IBEX stock option plan:

	April 30 2011		July 31 2010	
	Number of options	Weighted average exercise price \$	Number of options	Weighted average exercise price \$

0.50-0.70	130,500	1.40	0.59	130,500	0.59
	<u>1,315,500</u>			<u>1,315,500</u>	

5. Profit (loss) per share

Loss per share is calculated using the weighted average number of shares outstanding of 24,703,244 (2010: 24,703,244). Securities which dilute profit per share are employee options.

There were no adjustments to the weighted average number of shares outstanding for purposes of calculating the diluted loss per share for the period ended of April 30 2011 because to do so would be anti-dilutive.
